

Much Rheumatism

Local Druggist's No-Cure, No-pay Offer Attracts Many Sufferers

If there are any rheumatic sufferers in town who have not availed themselves of the Lee & Osgood Co.'s generous offer, they should do so at once. They state that if Rheumatism, the guaranteed prescription for which is a quick and joyful relief, they will return the purchase price without any quibbling or red tape.

Rheumatism is a dangerous disease, and anyone who has the slightest taint of it should drive it out of the system as soon as possible. Read what Rheumatism did for this sufferer:

I have been laid up for one year with chronic arthritis. I had doctors galore, and also spent four months in a sanatorium hospital at Troy, N. Y., but had practically no relief. Then I started taking Rheumatism. I have now taken five bottles, and am going without crutches or other aid, which I could not do for the last nine months. I highly recommend it to anyone who is suffering from rheumatism in any form.—Thomas H. Eddy, Schuylkill, Pa.

Good druggists everywhere sell Rheumatism and a large bottle is inexpensive.

Migrating Through Serbia.

The great migration of refugees and soldiers through Serbia continues. And all of them aid in spreading typhus. Returning Czechoslovak, Serbian, Greek, Montenegrin, Albanian, Bosnian, and Rumanian prisoners from the Central Empires pass through Belgrade.

From the south pass Bulgarian prisoners returning to their homes. Turks migrating back to Macedonia and to Turkey in Asia. Serb civilians from the formerly occupied northern region of Serbia. Czechoslovak soldiers going north with the army of occupation, refugees, prisoners and soldiers of all the nations mingle on the one big north-south highway of Serbia.

Out of Bulgaria some half-starved Greek, Serbian, Albanian, Montenegrin and Bosnian soldiers and civilians held in bondage there during the war. All of them are in rags. Their bones show through their flapping garments. None have had medical care nor seen soap in years. As a result they are alive with vermin and carry with them the germs of typhus.

Sanitary officers of the American army and the Red Cross bar the route of these north-south streams of humanity and herd them into the "de-lousing" stations where they are bathed and barbered while their garments are steamed in disinfectant.

Despite the fact that in 1915 between 30 and 40 per cent of the population of Serbia had typhus and at least 75,000 died of it, the average Serb today apparently would rather have the disease than take a bath in lysol.

In their minds disease is the will of God and any connection between typhus and the louse is an American superstition.

PLAN CLOTHES MEN ON POLICE FORCE

The local police department, in order to stop autoists from speeding through the main thoroughfares of the city, have resorted to the use of plain clothes men. These plain clothes men will be stationed along the principal streets of the city and when an autoist is seen to be going at an excessive rate of speed, a speed that endangers life, the plain clothes man will report the autoist's number to a uniformed officer who will make the arrest.

These measures are the outcome of many complaints that have been lodged with the local police about the speeding of the automobile owners in the city, which has become a nuisance and a danger. The men autoists are not the only ones that will have to mend their ways or pay fines as there are a number of women drivers after the fashion of the city, who are also liable to be reported.

Who these plain clothes men—there are to be two of them—are will not be known outside the police commission's and a man's best friend may have to report him for speeding.

The question now arises how long it will be before the plain clothes men will be known to every automobile owner in the city. How are the police going to keep it from the public? After the first case, if the plain clothes man appears as a witness against the offender, the whole town will know who he is and be on the watch for him. The only solution to this will be that the plain clothes man will have to resort to metropolitan methods, either assume a disguise or wear a mask when he appears before his victim as a witness.

The police, however, are bent upon stopping the speeding of automobiles on the city streets, especially on the square where it is noticeably evident that the autoists are not conforming to law and are endangering the safety of pedestrians. The plain clothes men will go on duty on Saturday and the police commissioners on Thursday evening will announce their intention and after that it was up to the automobile driver to run at a moderate speed, or the chances of being haled into court and fined.
